

Job title: Production Lab Technician

Job location: Magnolia, TX 77355

Job type: Full-Time

Compensation: DOE with full benefits

Job Category: Laboratory

The liner division of Magnolia Gardens Nursery invites applications for the position of Production Lab Technician to work in its plant tissue culture facility. Candidate must be able to work individually or as a team with other lab technicians and lab management to ensure that laboratory protocols and methods run efficiently and correctly, while at the same time assist in developing and evaluating new methods. We are willing to train the right people, so the candidate must display excellent communication skills, be ready to learn, be efficient, well organized, flexible and able to deliver high quality results on time. This position is a hands-on lab-based role which requires the ability to concentrate and pay strict attention to details.

Responsibilities:

- Apply standard laboratory techniques and safe practices
- Plant initiation, production and maintenance of tissue cultured plants using proper aseptic technique
- Perform general lab maintenance and housekeeping per department procedures
- Cleaning glassware and other laboratory utensils
- Preparation of culture media
- Moving cultures to and from the growth room with accurate placement
- Monitoring lab environmental conditions
- Collection and analysis of data,
- Compilation and presentation of reports and protocols
- Inventory control
- Must be detail oriented and able to adapt quickly to changes.
- Ability to communicate well with all personnel in the company.
- Must be patient, able to manage repetitive tasks, and have the ability to maintain a sense of flexibility/adaptability towards changing priorities.

Qualifications:

- Associate degree or Certificate - Laboratory assistant with two (2) years laboratory experience preferred
- Authorized to work in the U.S.
- Positive attitude and ability to learn quickly
- Adaptable to changing processes
- Self-driven professional with great work ethic
- Ability to lift 40 pounds
- Ability and willingness to work on feet or sitting at the lab bench for 8-10 hours a day
- Are organized, enthusiastic and dynamic.
- Have a keen eye for detail and are motivated by creating the highest quality of tissue cultured plants
- Must be patient, able to manage repetitive tasks,
- Enjoy working with others as a member of a team and striving for the best results
- Spanish knowledge is helpful but not essential.
- Strong computer skills. Ability to use Word, Excel and Power point is critical.
- Other duties as assigned.

Preferred Qualifications:

- Bachelor's degree in biology, horticulture, chemistry, or another related field.
- One 1 (one) to two (2) years laboratory experience
- Experience with and knowledge of aseptic technique
- Knowledge of different aspects of plant tissue culture including:
 - Plant initiation, production and rooting of tissue cultured plants
 - Formation of crop schedules
 - Selection of appropriate media for optimal plant culture growth
 - Tracking of plant growth and development through all stages of in-vitro growth
 - Maintaining good quality control (QC) over all crops

Working Conditions & Physical Requirements

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. While performing the duties of this job, the employee is regularly required to meet the following standards:

- May be required to work weekends, off-shifts, and overtime as required.
- Work with and around pressurized tanks, housings and equipment, which are connected by piping and pumps and serviced by pressurized steam, water, air and cleaning/sanitizing chemicals systems.
